2025 FEBRUARY

SGA News

2025 February Semester Orientation Day

On February 3rd, SGA hosted its February Semester Orientation at Park Home Campus. Our Vice-Principal gave an opening and welcome speech and introduced students to the St. George Education Group and the St. George High School policies.

New students have enjoyed their first day at SGA by joining returning students in playing ice-breaker games. The Orientation Day included, in addition to an introduction about school services and facilities, info presentations from Toronto Police on safety in the city and BMO bank representatives on student accounts and benefits.

VALENTINE'S DAY ACTIVITY

Annually, Valentine's Day is one of the most exciting holidays for young students. We incorporate fun Valentine's Day themes into hands-on activities and provide them with a precious opportunity to express love.

On February 14th, SGA students created their cards and spread love on a heart-shaped board to express wishes to the ones they love. We also offer "Cupid Service" to deliver gifts and cards secretly for our students.

School Clubs Day at SGA

On Friday afternoons, SGA students have been enjoying their time participating in club activities on campus. Public Speaking, Creative Thinking, Ping-pong, and board games were the highlights of the past weeks.

Clubs Day events at SGA showcase the various clubs and extracurricular activities that students can join. It's an exciting opportunity for students to explore new interests, meet like-minded peers, and get involved in activities outside of the classroom. SGA School Clubs Days are always a great way to explore new interests and get involved in different activities

Graduating Student Testimonial

What are you planning to do after completing your studies?
I recently got an offer from the University of Toronto - UofT St. George Campus for Computer Engineering with a scholarship of $48,000. I have always been interested in Science and Engineering, so I want to work in Canada after graduation in AI field,

SGA is a wonderful school, the teachers are knowledgeable and very kind to all students. They helped me learn a lot from their teaching; it was engaging. I have a lot of good friends from different countries, and the experience that I had as a Vice President for the Student Council helped me improve my leadership skills and make our school environment more vibrant.
